
Environmental Policy

Dare Studio have always pro-actively considered the environment and the potential impact on our surroundings.

The care which Dare Studio puts into furniture design and manufacture is reflected in the way which the entire company approaches its role in environmental issues.

We recognise our responsibility to supply high quality products that are built to last the test of time.

One of our key environmental success' is our local manufacturing base in Brighton and only producing products on a made to order basis, thus keeping our carbon footprint to a minimum.

Our products are designed to be simple to produce with very few materials. They are predominantly manufactured and assembled by hand, which means they can be easily disassembled, repaired and re-furbished if required.

Dare Studio are proud to use only the highest quality crop grown sustainable hardwoods (FSC certified) and we continually support the Million Tree Campaign (www.milliontreecampaign.com)

Our policy is to recycle the majority of our wood waste products where possible and to use water based finishes rather than solvent based finishes to protect the air we breathe.
